EMSP organises European Parliament debate on real world data

People living with multiple sclerosis (MS) in the European Union could receive timelier access to safer and more efficient therapies. The key is the better exploitation of so-called Real World Evidence (RWE). This was the main conclusion of a European Parliament debate co-organised on 7 March by EMSP and MEP Cristian Buşoi. Read more.

MS testimony: Life is not a fight

Florența Cernescu is 29 years old and she has been diagnosed with both multiple sclerosis and Lyme disease. She will be speaking at EMSP's upcoming 2017 Spring Conference. Read more.
