Clinical Presentation

Diagnosis & Assessment

Treatment

Care & Support

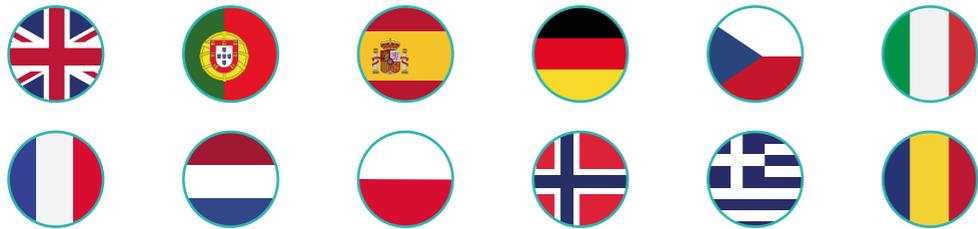

Rehabilitation

## Our pan European MS nurse community

The MS Nurse PRO e-community provides a virtual faculty for nurses to share knowledge, skills, challenges and questions. We aim to find answers and solutions together.

### Available in 12 Languages

MS Nurse PRO is actively supported and managed by EMSP, RIMS and IOMSN.

## Join an active community

+ **600** new members yearly from all regions of the world

+ **300** completers of the Foundation Programme annually

MS Nurse PRO is actively promoted in **15 European countries** representing **452 million inhabitants**.

## How can you join?

Joining the MS Nurse PRO community is free for all health care practitioners active in clinical practice. The community is open for professionals from all nationalities that work directly or indirectly with or for persons with MS (PwMS).

Subscribers need to agree and respect: MS Nurse PRO's terms & conditions, its code of conduct and its privacy policy.

Sign up today via [www.ms nursepro.org](http://www.ms nursepro.org)

## About MS Nurse PRO

MS Nurse PRO is a registered brand and a project of EMSP iasbl.

**European Multiple Sclerosis Platform iasbl**  
Rue Auguste Lambiotte 144/8,  
B-1030 Brussels, Belgium

Publication date: 1<sup>st</sup> January 2021

*"The MS Nurse PRO e-learning really increased my confidence to answer the questions raised by persons with MS. The training also improved my dialogue with other nurses and doctors."*

## Your gateway to become and remain an accredited MS care professional

MS Nurse Professional is a European-focused, e-learning training curriculum for nurses who work with people with multiple sclerosis.

By joining MS Nurse PRO, you also become a member of a pan European MS nurse community.

**Sign up for free today as an active health care practitioner**

# Your learning offer

MS Nurse PRO provides six comprehensive, interactive courses. As a learner, you can check your learning in quizzes, read additional in-depth information, reflect on your own learning and take notes.

## Understanding Multiple Sclerosis

This course provides the essential concepts and information required to answer PwMS' questions about what causes their disease and how the disease will affect their future life.

## Care and Support

This course examines the relationship of the person with MS and the nurse. Learners learn about the psychological and social impact MS can have on individuals and their families. This includes mental health issues such as depression, anxiety and cognition as well as the impact on employment and social activities. Learners gain understanding of how nurses can optimise the outcomes for someone living with MS.

## Clinical Presentation

This course reviews the different types of MS and their clinical features, including atypical presentations of the condition. Common symptoms are discussed and defined, along with the prognosis of people with MS.

Join an active community of nurses that strive for harmonised minimal standards of care for people living with multiple sclerosis across Europe.

The content is curated by expert MS nurses, educational experts, rehabilitation professionals, persons with MS and neurologists.

## Diagnosing and Assessing Multiple Sclerosis

This module explains the diagnostic criteria along with the associated diagnostic tools, their results and consequences in a manner that a nurse can easily understand and interpret, and then relay to a person who has MS.

## Treating Multiple Sclerosis

This course reviews the pharmacologic management of MS. It explores current disease modifying therapies (DMTs) and associated nursing issues. Symptom management is discussed with an emphasis on pharmacologic management.

## Rehabilitation

This course highlights the importance and relevance of rehabilitation for the quality of life of people living with MS. The course covers all aspects of MS rehabilitation from goal setting to the different types and methods of rehabilitation.

Our experts develop all scientific content for the courses, they review all contributions for scientific and clinical accuracy and are keen to interact with all members of the community.
